

7.8 Billion people want
clean, affordable and
constant energy

We spend \$9 trillion per year on energy

ZPower invented solar
panels that work at night

After 20 years of development and \$5 million invested -
our panels work constantly (day and night)

Future image of the ZPower Power Plant

We sell electricity to Utility
Companies for lowest ¢

A small utility contract (100 megawatts) generates \$445
million profit

Next Steps

Complete then manufacture our first product - 1 megawatt generator (will power 500 homes)
